Select Installation Type

Step By Step process

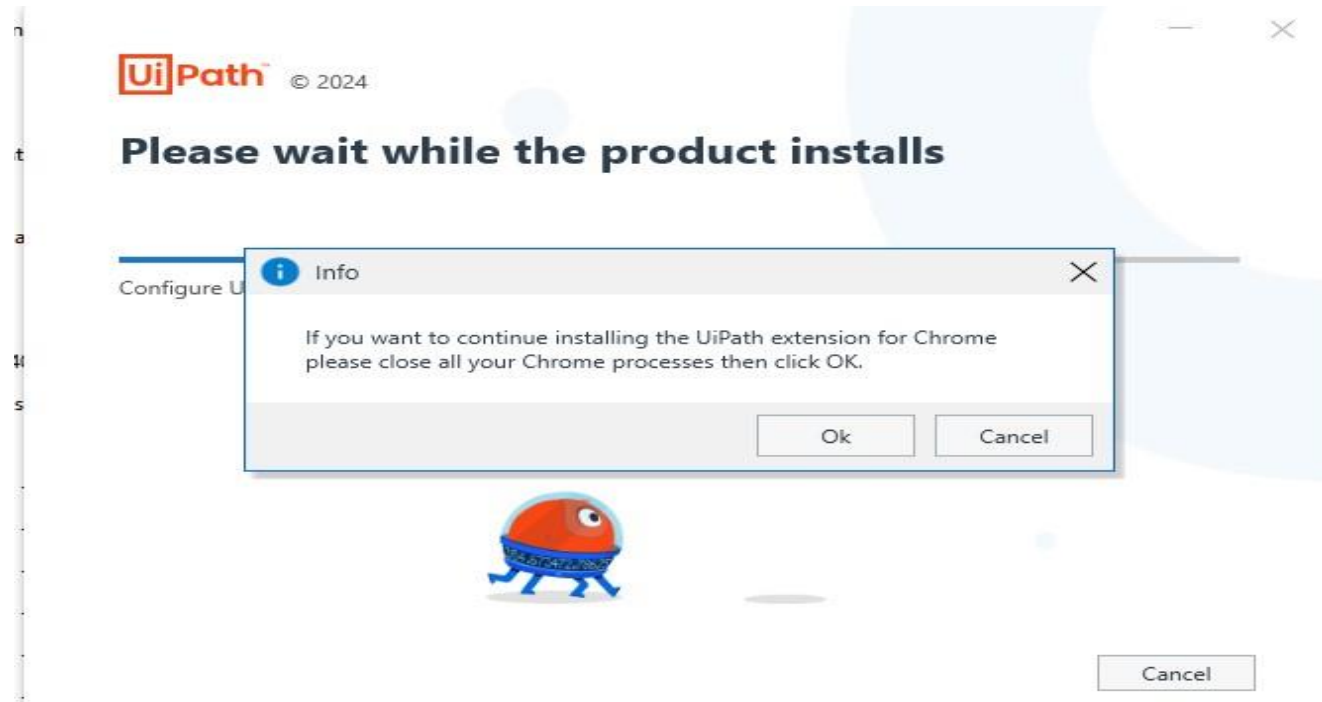

- When the installer launches, you will be prompted to choose between different installation types:
- Quick Setup: Installs UiPath Studio and Robot with default settings.
- Custom Setup: Allows you to choose specific components and settings. This is useful if you want to change the installation path or select specific packages.
- Choose Quick Setup for a faster installation, or Custom Setup if you need more control.

Select Installation Path

Step By Step process

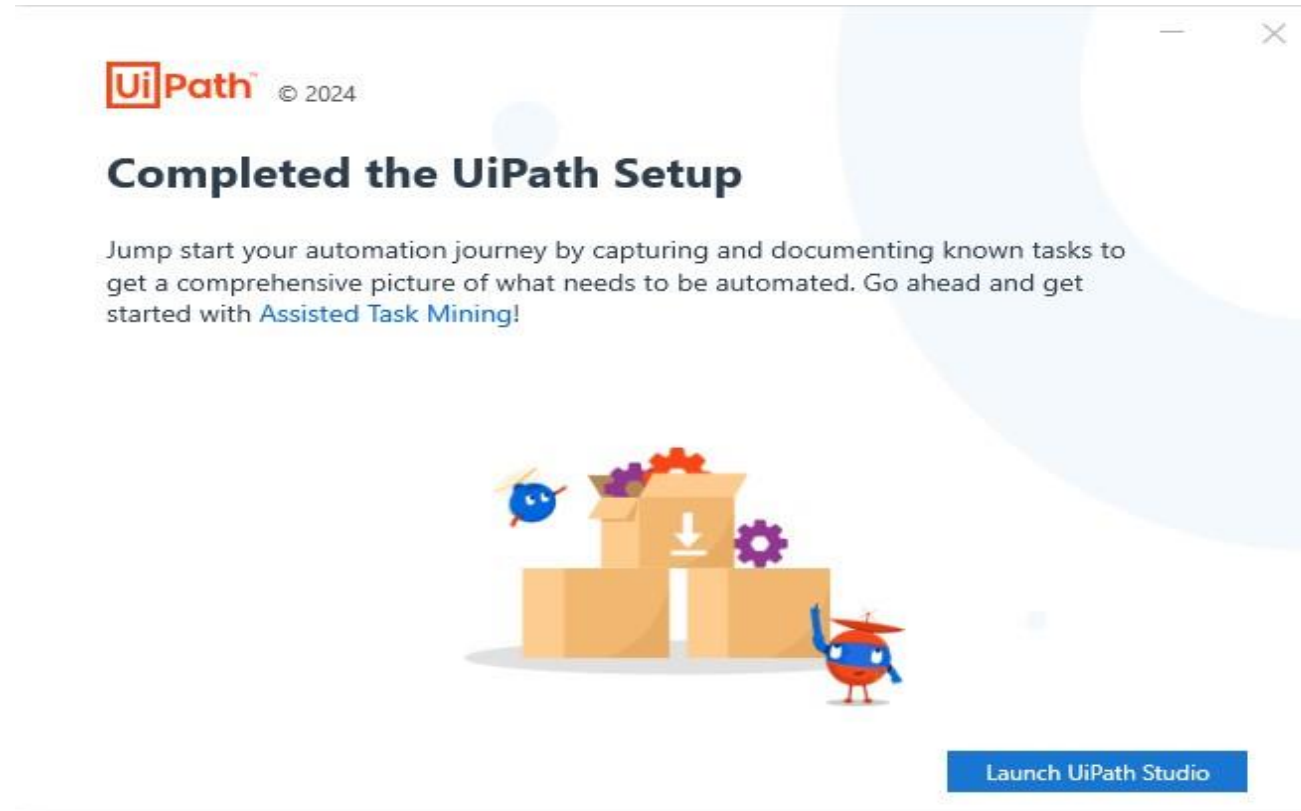

- If you chose the Custom Setup, you could change the default installation directory. Otherwise, it will be installed in the default location.

Launch UiPath Studio

Step By Step process

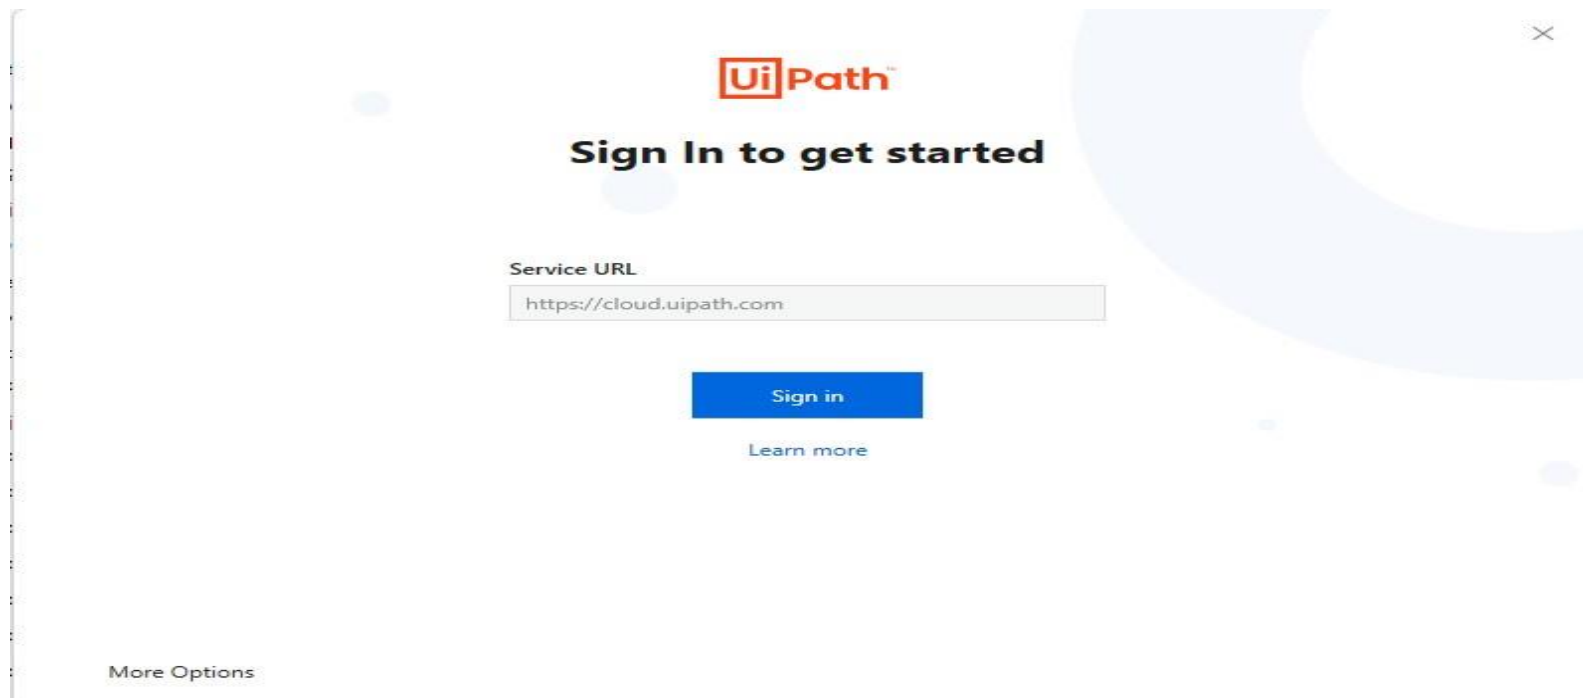

- Once the installation is complete, you will see an option to Launch UiPath Studio.
- Click on it to open UiPath Studio.

Sign In to UiPath

Step By Step process

- On the first launch, you will be prompted to sign in with your UiPath account. Use the same account credentials you used to download the installer.
- After signing in, UiPath Studio will connect to your Orchestrator instance (if applicable) and load the necessary resources.

Start Creating Automations

Step By Step process

- After selecting your profile, UiPath Studio will open, and you can start creating automation projects.
